

**Thermoplastic Grease Interceptors**

Lightweight polypropylene. Removable inlet and outlet baffles. Ribbed design reinforces and adds strength. Can be installed on the floor, partially in the floor or fully recessed. Connects to kitchen sink. For recessed installations, lid only withstands a load of 440 lbs. and supports light floor traffic only. Recess riser extensions available for deep installations. Quick disconnect latching system. Recessed silicone gasket in lid provides an airtight seal, preventing leaks and odors. Standard mechanical no-hub connection. Ask your plumber about additional options. Professional installation is recommended. PDI certified. IAMPO listed. **Low Profile Unit** is perfect for areas with limited space. **Compact Units** have smaller footprint making them ideal for small spaces and a non-ribbed section on the bottom 2" for easier cleaning. Compact units also have an enhanced baffle system for more efficient separation of grease at low flow rates.

**OUTSTANDING 10 YEAR WARRANTY WITH WARRANTY CARD SUBMISSION**

East Coast codes may require interceptors with pre-assembled flow control devices featuring factory prepared spigot connections. Installation is simplified using commonly available no-hub couplings to make the connection to the drainage system in line with local requirements. Please specify type of connection required.

**Disposable Aprons**
