KoldFront Walk-Ins with Remote Refrigeration

Extended compressor warranty at no extra charge!
Includes pre-assembled remote refrigeration which allows installation flexibility. The walk-in box is for indoor placement only (ships unassembled), but the refrigeration can be installed in a different room than the walk-in, or outdoors. Less noise and heat is generated by installing the refrigeration away from the walk-in. System includes low ambient controls, crankcase heater and rainproof outdoor housing. *Refrigeration installer is required.* 208/230V, single phase.

Units include:

- 34"Wx78"H door
- **LED lighting** with aluminum housing and unbreakable lexan globe
- PC refrigeration system supports the widest temperature range in the industry, operating effectively from -20°F to +120°F. Lower energy, less run time and longer life than competitors' systems. Features pre-charged condensing unit and enough refrigerant to handle up to a 50' lineset.
