\*Standard "trade" sizes listed. Actual size is 1/2" smaller.

**Grease Containment Systems**

Attaches to your existing exhaust fan (adjustable to various models and sizes). Absorbs grease and oils on contact and prevents new grease deposits from ever hitting the roof. Built-in drain. Includes screws, adaptors and mounting racks for easy installation. Filters (original supply included, replacements sold separately) are environmentally friendly and last 3 to 6 months. **Model #045-001** is perfect for kitchens with standard volume; **#045-002** for kitchens with larger volume (requires use of two filters). ~Made in the USA~ **Optional hinge kit** brings exhaust fans up to code. Includes chains and hardware for installation. Allows safe and convenient access during cleaning.

**Baffle Grease Filters**

"Roll lock" seam design resists flexing and twisting, preventing the filter from rattling and falling out. Fully interchangeable with existing filters. 2"D.

Stainless steel filters are the easiest to clean, will last the longest and have the best appearance.

Aluminum filters are lighter in weight and still offer a nice look.

Galvanized filters are a more economical option to aluminum or stainless steel filters.
