

Datasheet

UltraVent® Type 62

The condensation technology absorbs and dissipates vapours and steam. There is no need for complicated and expensive installations to remove exhaust air. Installation is simple and it can be retrofitted at any time.

Hint:

The local norms and specifications for air conditioning systems must be observed. A raised base cabinet US III (956 mm) should be used for installation on type 61 units.

Technical specification::

Connection: 120 V 1 NAC 50/60 Hz
Connected load: 450 W
Water connection (pressure hose): 3/4"
Extraction volume: 35,000 cu. ft/h (1,000 m³/h)
Running noise stage 1: 55 dBA
Running noise stage 2: 60 dBA
Width: 42" (1,076 mm)
Height: 15 3/4" (400 mm)
Depth: 53 3/4" (1,368 mm)
Weight: 132 lbs. (60 kg)
Approvals: UL 197, UL710B, NFPA96, Chapter 13

Features::

- Integrated lighting
- Easy-clean grease filter (CNS)
- High extraction rate
- Proximity door contact switch
- Extraction rate automatically increased when cabinet door is opened
